

SafeTrace®

Donor management system

*The information
system that puts you in
complete control of
donor management.*

Designed by blood bankers.

For blood bankers.

With your needs in mind.

From Wyndgate Technologies®

A division of Global Med Technologies®, Inc.

Donor management

Be Safe. Be Sure. Be Sure.
With Wyndgate.

Wyndgate's products are designed to enhance safety and increase efficiency and productivity.

Our SafeTrace® donor management software and SafeTraceTx® advanced transfusion management software provide complete Vein-to-Vein® tracking – from donor recruitment and collection to final transfusion and billing.

Call Wyndgate Technologies today. See how Vein-to-Vein tracking can help you enhance the safety and efficiency of your donor and transfusion service operations.

System Highlights

- Oracle® database for ease of operation and compatibility with standard third-party database tools
- Comprehensive donor recruitment capabilities
- Manages fixed site and mobile donor collection
- Real-time and historical donor demographic and deferral data
- Extensive safety checks throughout the system
- Manages inventory levels, distribution and billing
- Interfaces with automated testing equipment
- Provides revenue opportunities with its Client Testing module
- Supports emerging regulatory guidelines, such as AABB, FDA and HIPAA, and standards such as HL7 and ISBT 128
- 510(k) clearance

Wyndgate Support

Wyndgate's Professional Services staff will assist you in making the right decisions for your business - from installation and training to implementation support. Based on your operations and staff, we help you implement the system to achieve your goals.

We provide user-friendly documentation to assist you with managing SafeTrace on your own. But if questions or issues should arise, our customer support specialists are available around the clock, 24/7, to help.

As a Wyndgate client, you will be invited to join the User Group where we discuss the enhancements that are important to you and the direction of future development. This is the driving force behind our continuing success in delivering the best blood bank software products.

ement system

SafeTrace Features & Benefits

Donor Recruitment

Manages recruitment and scheduling of donors, mobiles and donor groups. Flexible, on-demand and scheduled call lists enable you to target specific donors.

Donor Management

Facilitates the registration of new, returning, or potential donors and maintains complete demographic data. Real-time donor deferral information helps to determine donor eligibility.

Mobile Donor Management

With SafeTrace, you can register donors and collect donor data off-site and download and upload critical donor demographic and deferral information in minutes. Donor deferral information is available for determining eligibility even on mobile blood drives.

Special Procedures

SafeTrace helps you register patients and manage their special transfusion requirements for autologous or directed donations, special red cell phenotypes or HLA-matched products.

ISBT 128 Labeling

When you are ready to convert to ISBT 128 blood component labeling, SafeTrace is ready to print the new ISBT 128 labels on demand.

Laboratory

Captures results of required and optional testing and automatically quarantines donations determined to be unsuitable. Bar code scanning facilitates the labeling and verification process.

Automated Laboratory Test Instrument

Interfaces

SafeTrace has been specially designed to interface with the majority of automated laboratory test instruments. Wyndgate has partnered with Data Innovations, Inc. to help streamline the setup and management of automated test instrument interfaces.

Inventory-Distribution

Provides an up-to-date inventory of available products at all sites. Tracks products from the distribution location to customers or other sites, and generates shipping documents.

Billing

Automatically captures charges for blood products and associated services. Whether you generate customer invoices or link to a third-party accounting system, SafeTrace provides detailed billing for services and products at the pricing level you determine.

Client Testing

SafeTrace supports an automated system for managing testing for external clients of a blood center. Helps you manage client contracts and profiles, accession samples, report results and generate invoices.

Supplementary Products:

Web-based Report Server

Our new, easy-to-use Web-based Report Server lets you create customized reports and donor call lists.

Donor Web Scheduler

Wyndgate's Donor Web Scheduler provides regular donors with the flexibility to make appointments for donations at their convenience via the Internet.
